the company's Ridgeland brand, which makes moulding starch, dusting starch, powdered cellulose, anti-caking blends and insoluble fibers.

The plant is expected to be open before the end of the year, with 25 full-time positions within the first three years of operation.

### Dubai Hotel to Use Local Company's Technology

A five-star hotel in Dubai will deploy the Ecosmart energy management platform developed by a Wauwatosa technology firm. Officials with Telkonet Inc. said the Kempinski Hotel Mall of the Emirates will install the technology, which will help reduce consumption of both electricity and chilled water. The technology monitors hotel room air conditioning systems by reducing power use and preventing the systems from running when the rooms are vacant.

Telkonet has expanded its EcoSmart platform into the luxury hotel sector in the Middle East, as well as the United States and the Caribbean.
